Summary

Computer Science undergraduate specializing in AI & Future Technologies at SRM University AP (9.15 CGPA) with strong foundations in DSA, OOP, DBMS, and scalable software development. Skilled in building full-stack web platforms and real-time ML pipelines using React.js, Next.js, Node.js, TensorFlow.js, and LLM APIs. Hackathon award-winner seeking AI software engineering roles.

Education

SRM University AP, Amaravati

B.Tech in CSE (AI & Future Technologies)

Aug 2024 – May 2028

CGPA: **9.15 / 10**

Relevant Coursework: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks

Technical Skills

Languages: Python, Java, SQL, JavaScript

Frontend: React.js, Next.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: MongoDB, MySQL

AI Tools: Gemini API, Anthropic Claude, Claude Code, Prompt Engineering, TensorFlow.js

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools & OS: Git, GitHub, Postman, Linux/CLI, VS Code, Vercel

Projects

Derm AI — AI Skin Assistant — *Next.js, TensorFlow.js, Autoderm API*

[🔗](#) | [Live](#) | *May 2025 – Jun 2025*

- Led ML & Backend development; integrated Autoderm AI API and TensorFlow.js pipeline for real-time classification of **30+ skin conditions** with ICD-coded diagnostic results.
- Deployed as a mobile-first PWA with UV Index & Air Quality monitoring via geolocation APIs, scan history, and severity-based health recommendations.

Emotion Support Engine — *BiLSTM, BERT, Gemini API, Streamlit*

[🔗](#) | [Live](#) | *Jul 2026*

- Built a hybrid BiLSTM/BERT emotion-classification pipeline paired with the Gemini API to detect learner affect and generate personalized, emotion-aware learning support recommendations.
- Developed and deployed a Streamlit interface for real-time interaction; delivered as part of the Google Cloud Generative AI virtual internship (APSCHE × SmartBridge), scaffolded using the Antigravity IDE.

AlgoViz Studio — DSA Visualizer — *React.js, Vite, Tailwind CSS*

[🔗](#) | [Live](#) | *Jul 2026 – Aug 2026*

- Built an interactive visualizer covering **16+ algorithms across 7 categories** (sorting, searching, graphs, DP, backtracking, greedy, BSTs) with step-by-step execution and zero-jitter scope watcher.
- Integrated curated interview prep sheets (Striver 180, Love Babbar 450, Blind 75) and core pattern guides, plus dual-mode graph visualization with real-time Web Audio pitch feedback.

Certifications

- **Google Cloud Generative AI Virtual Internship** — SmartBridge & APSCHE (Jul 2026) — Developed a hybrid emotion-classification engine with Gemini API for personalized learning support.
- **Google AI Professional Certificate** — Coursera & Google (May 2026) — 7 courses covering AI Fundamentals, Data Analysis, and App Building. Built 20+ AI artifacts.
- **Claude 101** — Anthropic (Jun 2026) — Certified in Anthropic Claude architecture, prompt engineering, and core LLM capabilities.
- **Claude Code 101** — Anthropic (Jun 2026) — Certified in agentic coding workflows, terminal automation, and AI software engineering with Claude Code CLI.

Achievements

- **3rd Place** — **AIFT Summer Challenge 2025:** Awarded for *Derm AI*, recognizing excellence in AI application development for healthcare diagnostics.
- **5th Place** — **Hack MSC 2.0 (National Level Hackathon):** Engineered a real-time safety monitoring system for mining workers, competing against top national teams under tight deadlines.
